Knowledge Base Information

The *var_list.txt/csv* files contain the tag list part of the config.txt file. The information included is exactly the same.

The following tables describe the fields contained in the files. For each field, the position on the Tag setup web pages is identified by a number in the **Nbr** column. (see snapshots following the tables).

Note: In both tables, the fields are listed in the order they appear in the *.txt files. This order differs from the order on the interface. Therefore, the numbering on the snapshots are not sequential.

2. List of Parameters (from Create New Tag)

After this table, a snapshot allows to locate those parameters that appear on the eWON web interface.

| Nbr | Field name | Description | Default Value | Acceptable Values |
|-----|-------------|--|---------------|---|
| NA | : | Separator | NA | NA |
| NA | :TagList | File structure | NA | NA |
| 1 | Id | Tag#, defined internally by the eWON | NA | Integer, first tag is 1, numbers of deleted tags are not re-used |
| 2 | Name | Tag name | [empty] | Text |
| 3 | Description | Tag description | [empty] | Text |
| 4 | ServerName | Name of the server which delivers the tag value | [empty] | One of the servers available in the eWON. Examples: EWON, MEM, DF1, etc.. |
| 5 | TopicName | Name of the topic the tag is part of | [empty] | A, B or C |
| 6 | Address | Address in the IO server | TagName | Register associated with the IO server. Example: F8:9 |
| 7 | Coef | Coefficient by which the IO server delivered value is multiplied | 1.000000 | Float |
| 8 | Offset | Offset added to the IO server delivered value | 0.000000 | Float |
| 9 | LogEnabled | Historical Logging enable | 0 | 0 Disabled 1 Enabled |
| 10 | AlEnabled | Alarm enabled | 0 | 0 Disabled 1 Enabled |
| 11 | Type | Type of variable | 0 | 0 Boolean 1 Floating Point 2 Integer 3 DWord |

Knowledge Base Information

| Nbr | Field name | Description | Default Value | Acceptable Values |
|-----|---------------|---|----------------|---------------------------|
| 12 | AlBool | Alarm level (for Boolean tags) | 0 | 0 Alarm on 0 |
| | | | | 1 Alarm on 1 |
| 13 | MemTag | Is tag a memory tag ? | 0 | 0 FALSE |
| | | | | 1 TRUE |
| 14 | MbsTcpEnabled | Publish tag in Modbus TCP | 0 | 0 FALSE |
| | | | | 1 TRUE |
| 15 | MbsTcpFloat | Publish tag in Modbus TCP 32 Bit format (would the value come from two consecutive registers) | 0 | 0 Disabled |
| | | | | 1 Enabled |
| 16 | SnmpEnabled | SNMP tag accessibility | 0 | 0 Disabled |
| | | | | 1 Enabled |
| 17 | RTLogEnabled | Real-time logging enabled | 0 | 0 FALSE |
| | | | | 1 TRUE |
| 18 | AlAutoAck | Alarm auto acknowledgment | 0 | 0 Disabled |
| | | | | 1 Enabled |
| 19 | ForceRO | Force tag read-only | 0 | 0 Disabled |
| | | | | 1 Enabled |
| 20 | SnmpOID | SNMP tag publication ID | 1 | TBD |
| 20b | AutoType | Automatic detection of variable type | 0 | 0 Disabled |
| | | | | 1 Enabled |
| 21 | AlHint | Alarm hint | [empty] | Text |
| 22 | AlHigh | Alarm level high | 0 | Floating point |
| 23 | AlLow | Alarm level low | 0 | Floating point |
| 24 | AlTimeDB | Alarm Delay (time deadband) | 0 | Integer (seconds) |
| 25 | AlLevelDB | Alarm Value deadband | 0 | Floating point |
| 26 | IVGroupA to D | Instant Value Group A to D (allows to filter extractions) | [not selected] | 0 FALSE |
| | | | | 1 TRUE |
| 27 | PageId | Index of the user page the tag is part of | 1 | 1 to 10 |
| 28 | RTLogWindow | Time span (period logged for real-time logging) | 600 | Integer [seconds] |
| 29 | RTLogTimer | Real-time logging interval (in seconds) | 10 | Integer [seconds] |
| 30 | LogDB | Historical logging deadband (do not log if value change is less than ...) | -1 | -1 Disabled |
| | | | | Floating point |
| 31 | LogTimer | Historical logging interval (in seconds) (value stored cyclically) | 0 | 0 Not stored cyclically |
| | | | | Integer [seconds] |
| 32 | AlLoLo | Alarm Level LowLow | [empty] | Floating point |

3. List of Parameters (from Alarm Notification)

After this table, a snapshot allows to locate those parameters that appear on the eWON web interface.

| Nbr | Field name | Description | Default Value | Acceptable Values |
|-----|------------|---|---------------|---|
| 1 | EEN | Email notification alarm | None | ECALM on ALM |
| | | | | ECACK on ACK |
| | | | | ECRTN on RTN |
| | | | | ECEND on END |
| 2 | ETO | Email TO field (recipient(s) address(es)) | [empty] | usr1@dom.ci |
| 3 | ECC | Email carbon copy (CC address(es)) | [empty] | usr2@dom.ci |
| 4 | ESU | Email subject | [empty] | Text |
| 5 | EAT | Email attachment | [empty] | Text and/or export block descriptor syntax. More details on http://wiki.ewon.biz |
| 6 | ESH | Format as short message | 0 | 0 FALSE |
| | | | | 1 TRUE |
| 7 | SEN | SMS notification type | None | SCALM on ALM |
| | | | | SCAC on ACK |
| | | | | SCRRTN on RTN |
| | | | | SCEND on END |
| 8 | STO | SMS Destination (Recipient dial number) - example: 0456334433,gsm,0 | [empty] | Dial number [text] |
| 9 | SSU | SMS content (subject) | [empty] | Text |
| 10 | TEN | SNMP trap notification type | None | TCALM on ALM |
| | | | | TCACK on ACK |
| | | | | TCRTN on RTN |
| | | | | TCEND on END |
| 11 | TSU | SNMP trap subject | [empty] | Text |
| 12 | FEN | FTP notification type | None | FCALM on ALM |
| | | | | FCACK on ACK |
| | | | | FCRTN on RTN |
| | | | | FCEND on END |
| 13 | FFN | FTP destination file name | [empty] | Text |
| 14 | FCO | FTP file content | [empty] | Text or EBD |

Knowledge Base Information

| Nbr | Field name | Description | Default Value | Acceptable Values |
|-----|-------------|-------------------------------------|---------------|---|
| * | AlStat | Alarm Status | 0 | 0 No alarm |
| | | | | 1 Pretrigger |
| | | | | 2 ALM |
| | | | | 3 ACK |
| | | | | 4 RTN |
| | | | | 5 END |
| ** | ChangeTime | Last time the tag value has changed | [empty] | Date/time |
| *** | TagValue | Current tag value | 0 | Depending on variable type |
| * | Tag Quality | Current tag quality | NA | 16-Bit value (OPC Based) More details on http://wiki.ewon.biz |
| * | AlType | Alarm type (level) | NA | 0 no alarm |
| | | | | 1 warning level HIGH |
| | | | | 2 warning level LOW |
| | | | | 3 Boolean alarm level |
| | | | | 4 alarm level HIGHHIGH |
| | | | | 5 alarm level LOWLOW |

- * This information is published on the Alarm summary page
- ** This information isn't published
- *** This information is published on the View IO page

Note: Many values are 0 or 1. Due to type conversion inside the eWON, a 1 may appear as -1. Hence, when parsed by the eWON, -1 and 1 mean the same.

Knowledge Base Information

The screenshot shows the 'Alarm Notification for tag' configuration page in the eWON web interface. The page is divided into several sections, each with a set of checkboxes and input fields. Red circles with numbers 1 through 14 highlight specific elements:

- 1**: Alarm Notification for tag: (checkbox)
- 2**: EMail upon: (checkbox)
- 3**: Short Message: (checkbox)
- 4**: EMail to: (input field)
- 5**: EMail CC: (input field)
- 6**: EMail Subject: (input field)
- 7**: EMail Attachment(s): (input field)
- 8**: SMS upon: (checkbox)
- 9**: SMS Destination: (input field)
- 10**: SMS Subject: (input field)
- 11**: Put FTP upon: (checkbox)
- 12**: Destination File Name: (input field)
- 13**: File Content: (input field)
- 14**: SNMP Trap upon: (checkbox)
- 15**: Trap Subject: (input field)
