

## Connect your eWON to a Siemens LOGO!

You can achieve the Remote Maintenance of a LOGO! device with eWON.

You need to connect your LOGO! to the Serial Port of your eWON, configure the VCOM in RawTCP and set the VCBUFSIZE to 128 (see [VCOM: buffer\\_size\\_advanced\\_parameter](#)).

On your computer, use eVCOM as usual.

You should also be successful if you go through Talk2M.
