

Events.txt file size

This KB answers to 2 questions:

- What is the size of the events.txt file?
- How many lines could it store before circularization?

There are 762 lines in the events.txt file.

Mem Org	/usr size (MB)	Recording size (MB)	Number of points (Hist. Rec.)	Number of events	Number of alarm hist.
<input checked="" type="radio"/>	16	1	16384	762	8192
<input type="radio"/>	15	2	73728	762	8192
<input type="radio"/>	14	3	139264	762	8192

The table shows the possible memory organisations.
 If the memory organisation is changed, the new organisation will only be applied the **next time eWON boots**.
 Changing the memory organisation result in a **complete format of eWON**. Everything except the COM configuration will be erased.
 If the /sys partition size is NOT 0, the program and config files will be stored there.
 If the /sys partition size IS 0, the program and config files will be stored in the /usr partition
 The current configuration is displayed in **red**

If you go on the eWON "Memory config" page (SystemSetup->Storage->MemoryConfig) you will find this information.
