

Irc file format compatibility in FW6

Due to the apparition of the Tag Quality in the firmware 6 of the eWON, the file format of the data has been adapted. There is an additional column for this quality.

See chapter 6 of the [KB-0039-0-EN-\(Tag Quality\)](#).

But you can force the eWON with firmware 6 to export all its data in the older format (like 5.7) by using the parameter `PreRev6Compat` in the `config.txt` file.

By default the value is 0, and then the Quality column will be present.

```
PreRev6Compat:0
```

Set the value to 1, and the eWON will export data without this Quality information.

```
PreRev6Compat:1
```

Then, no need to refactoring your "Server application" to import eWON data with firmware 6.
