Install manually the TAP adapter
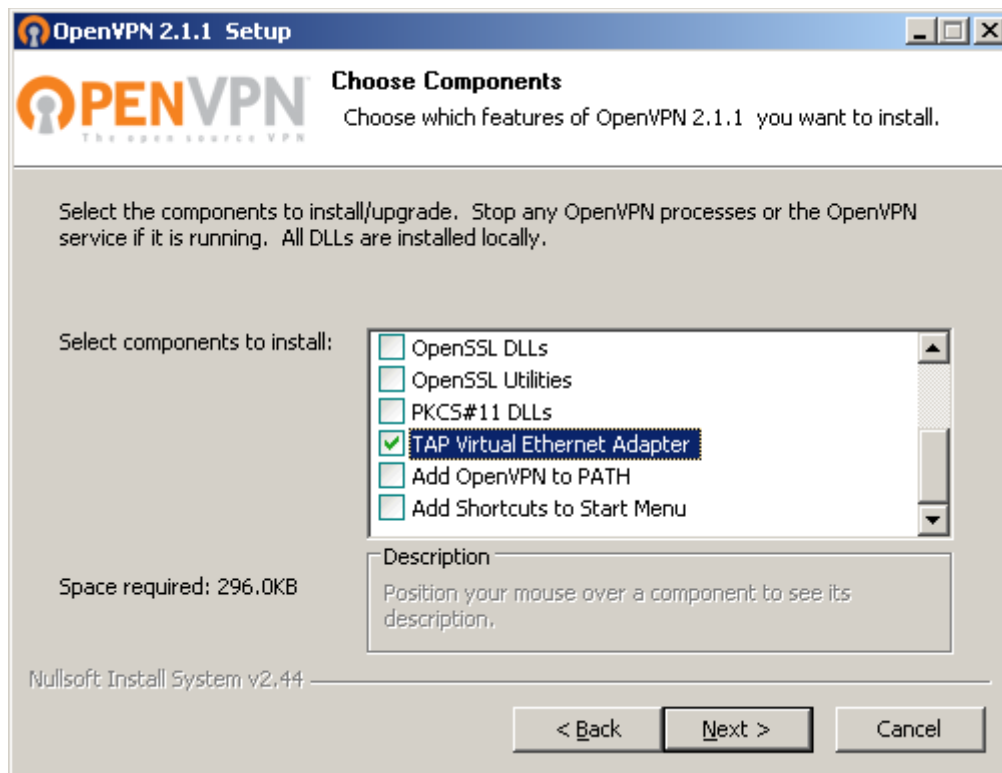

On Windows 7 the eCatcher installation could fail to setup the TAP adapter needed for the VPN connection.

- Note -

This concerns only installation of the eCatcher version 2 (eCatcherFree legacy).
The eCatcher version 3 is compatible with Windows7 and thus should not encouter this installation problem.

To manually install the TAP-WIN32 which is compatible with Windows 7, you can use the OpenVPN installer and select to install only the TAP-WIN32 driver.
