Send data from eWON to FTP with a dynamic filename

Imagine if you needed to send every day the Data recorded by the eWON to a FTP server, then build the filename with the date to avoid overwrite. Is it possible?

Using a Planner Entry is not possible in that case because you have no way to customize the filename of your Export Bloc Descriptor (EBD).

Instead of using the Planner Entries from the Configuration page, use the Basic script to create your Planner Entry.

Place the script for your Action in a Basic New Section:

```
MyAction:
  T$=Time$
  A$="/usr/MyData/Data"+T$(7 To 10)+"-"+T$(4 To 5)+"-"+T$(1 To
2)+".csv"
  PUTFTP A$,"[$dtHL $ftT $st_d1 $et_s0 $tnTestTag]"
END
```

And to call this Action at a Scheduled interval, use the ONDATE function (Planner Script function).
The best place is to place it on the Init Section.

```
ONDATE 1,"0 0 * * *","GOTO MyAction"
```

Now, every day at midnight, eWON will put a file on your FTP server with a name like Data2010-03-03.csv
