

## Retrieve system information

To read system information of the eWON (SerialNumber, firmwareVersion, IOserverCounter, ... all info from the estat.htm file), you need to use the getItem to extract it from the SysControlBlock.INF

```
public static void readINFBlock()  
{  
    SysControlBlock SCB;  
  
    try  
    {  
        SCB = new SysControlBlock(SysControlBlock.INF);  
        System.out.println("DskUsrFree:  
"+SCB.getItem("DskUsrFree"));  
    }  
    catch (Exception e)  
    {  
        System.err.println("Exception:"+e.getMessage());  
    }  
}
```
