

Use Talk2M Free Legacy with firmware 6.1

Since the March 2011 and the release of Talk2m Free+, the eWON wizard for Talk2M tries, by default, to connect you to the Talk2M Free+ (and Pro) Server.

If you need to add your eWON running firmware 6.0 (and above) to the "old first generation" Talk2M Free Server, you must use the link "Click here for old Talk2M Free" at the first step of the Talk2M wizard.
