

Is there an error in the viewON 2's digital signature?

I installed my viewON application some month ago and everything worked fine without any problem.

Now, every time I open the viewON page on the eWON, I receive following error message:

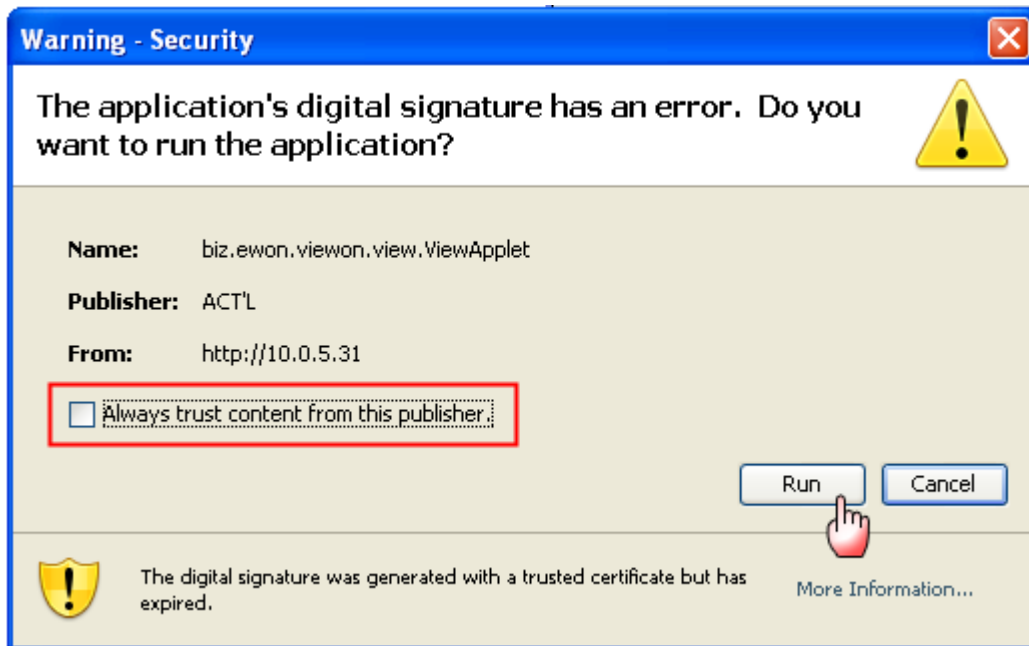

The reason for this Security Warning message is that the signature of the java applet which is needed to display the viewON application has timed out.

The signature validity has timed out on Mon Apr 26 01:59:59 CEST 2010 (... and every 26 April).

To avoid the display of this warning message, apply one of the following :

- If you have enough access rights, just check the "Always trust content from this publisher" and click on the "Run" button.

- If you do not have enough access rights or if you do not want to trust the content from the publisher, then you need to copy the new viewON java applet on the eWON.

This can be done on 2 different ways:

- **Solution 1:** Install the latest viewON software on your PC (using the viewon setup), recompile the viewON project and send the project on the eWON.
- **Solution 2:** Replace the viewON Java applet (ViewOnViewer.jar) on the eWON with the latest one. To realize this, open an FTP session on the eWON and put following ViewOnViewer.jar file in the /usr/viewon/ directory of the eWON.

- Note -

During download your Web Browser will probably rename the .jar file into a .zip file. In this case, just change the file extension into .jar before downloading the file on the eWON (so rename ViewOnViewer.zip into ViewOnViewer.jar).
