

## ViewON2 hangs at compilation

With viewON2 version 2.0.1c, you may encounter a hang when you try to Export your project to eWON.

The Export hangs at the compiling stage:

The compiling stage will never end and the viewON program will use a lot of CPU task to do nothing.

**You must close the Ftp Transfert dialog box by using the Close button (X button on the top right). The Cancel button will do nothing.**

**AND you must close the viewON2 application to end the waste of CPU time.**

This is due to a bug in viewON that doesn't handle correctly some strings considered as links. For instance, when a Symbol SVG file was modified with inkscape (0.46), it places a metadata in the SVG-XML file holding a purl.org link. The viewON2 compiler will hang on this link.

Workaround: you can remove this metadata (or comment it) and the compiler will not hang anymore.

Open your SVG file with a Text Editor program and remove the metadata (in bold).

```
<?xml version="1.0" encoding="UTF-8" standalone="no"?>
<svg
  ...
  sodipodi:docname="AnalogMeterGaugel.svg"
  inkscape:output_extension="org.inkscape.output.svg.inkscape">
  <metadata
    id="metadata44">
    <rdf:RDF>
      <cc:Work
```

```
        rdf:about="">
        <dc:format>image/svg+xml</dc:format>
        <dc:type
            rdf:resource="http://purl.org/dc/dcmitype/StillImage" />
        </cc:Work>
    </rdf:RDF>
</metadata>
<sodipodi:namedview
    inkscape:window-height="1005"
    inkscape:window-width="1280"
    ...
```
