

## Manual installation of the viewON 2 viewer

To display the viewON2 (old software version) pages, we need to install a viewer (a java library) on the computer.

If the computer where you need to display the viewON2 pages is not connected to Internet during the first display of a viewON2 application, the installation of this viewer will fail.

You can install this viewer manually (without any Internet connection) by running the viewON2\_setup program and choose to install the "viewer only".
